

Coating Options

DuPont® Teflon® PTFE (polytetrafluoroethylene)

- Black in color
- One-coat process
- Formulated with special blends of fluoroplastics and other high-performance resins to improve toughness and abrasion resistance
- Excellent corrosion resistance and good dry-lubrication properties
- Resins provide adhesion and abrasion resistance
- Low friction, nonstick characteristics
- No volatile organic compound (VOC) emissions

DuPont® Tefzel ETFE (ethylene/tetrafluoroethylene)

- Three-coat process (primer, midcoat and topcoat)
- Dark green in color
- Excellent chemical resistance
- The toughest of the fluoroplastics (a copolymer of ethylene and tetrafluoroethylene)
- Abrasion-resistant
- Applied through a spray-and-bake procedure in multiple coats, with each coat sprayed and baked individually
- Perfect for applications in harsh chemical environments
- High temperature resistance 150°C/302°F
